

Extentia Application For Apple Watch

Extentia Information Technology has launched the English Football - Fixtures and Results application for Apple Watch. Possibly it is a first application for Apple Watch from a Pune based IT company and among the few in India who were the 1st to develop apps for iPhone nearly 8-9 years ago. The app offers a flexible user interface and is packed with the English Premier League season 2015-2016 schedules, standings, and more. Users can stay updated about football's most popular annual tournament and track upcoming matches, receive reminders, and live notifications without having to reach for their iPhones.
