

Extentia unveils 'Xventor', its cloud-based event management enterprise app

By VARINDIA - 2019-05-10

XVENTOR
A Digitalized Event Experience

Extentia has launched 'Xventor', an event management enterprise app built on the SAP Cloud Platform. The mobile-ready platform with web responsive capabilities provides a range of features and an integrated experience. Event organizers can now manage multiple events using one unified platform including invitations, registrations as well as maintaining and updating the agenda in real time. Multi-Event Management, Attendee Engagement and Networking, Metric Monitoring and even GDPR (General Data Protection Regulation) compliant security make 'Xventor' a comprehensive and easy-to-use cloud-based app.

Umeed Kothavala, CEO, Extentia, says, "We are looking forward to a positive response for our newly launched event management platform, built keeping in mind multiple factors for a smoothly functioning event. Built on the SAP Cloud Platform, Xventor leverages the benefits of the cloud offering and is expected to add substantial value for businesses."
