The company said that the lab has been conceptualized keeping in mind 'Bauhaus' sensibility – a tribute to the movement's 100 years, using a lot of geometry, sustainability, retaining truth to materials, unifying art and technology. (company image)

customers that this certification will bring to us," said [Umeed Kothavala](#), CEO, Extentia. "This has strengthened Extentia's bond with SAP even further as we are all set to work closely with SAP's clients in India and neighbouring regions to help them with their digital transformation journeys."

The SAP AppHaus is built to drive innovation, creative thinking, critical insights, and transformational outcomes. The space would typically be used for conducting client workshops that require brainstorming, ideation, and strategy building, primarily around digital transformation, business processes and customer experience.

The company said that the lab has been conceptualized keeping in mind 'Bauhaus' sensibility – a tribute to the movement's 100 years, using a lot of geometry, sustainability, retaining truth to materials, unifying art and technology.

PUNE: Extentia Information Technology has launched an experience design centre, [XEN LAB PNQ](#), as a member of the [SAP AppHaus Network](#). The centre, the first in India and the second in Asia, has been set up in the company's Pune office.

The SAP AppHaus network involves collaborative workspaces owned by SAP or its partners that encourage human-centered innovation approach aimed at achieving business transformation, the company said.

"We're excited about being a member of the SAP AppHaus Network and look forward to plenty of new opportunities to work with SAP
